Ahmedabad, ASSOCHAM, India's Apex Chamber of Commerce is organizing its first BFSI Summit on the theme "INDIA GROWTH STORY - MARKETS, THEN & NOW!" with an objective to obtain compendium of articles on Investment Avenues in financial Space and get insights from the key decision makers from across the industry, in a fast growing BFSI Sector.

The Summit was inaugurated by Shri. Saurabh Patel, Hon'ble Minister of Energy, Government of Gujarat As Chief Guest along with Ms. Bhagyesh Soneji, Chairperson - ASSOCHAM Gujarat Council and BFSI Committee, ASSOCHAM Gujarat Council Chairman Mr. Madhu Menon.

In Financial Space, Insurance Solutions, Financial Planning & Wealth Management, Financing & Alternate Lending etc. Saurabh Patel, Hon'ble Minister for Energy, GoG encouraged ASSOCHAM team by selecting the right theme that is India Growth Story. He advised the audience to make the best use of the advise and guidance that will be given in the summit on their investment. He said that India's growth story has a very encouraging figures and comparing with other countries India is at a pace of 6-7% which is very promising and encouraging.

Essar Shipping eyes 38% growth in cargo volume

Ahmedabad, Essar Shipping Ltd (ESL) is eyeing a 38 per cent growth in cargo volume in the ongoing fiscal to 18 million tonnes (MT), a company official said. The company had handled 13.06 MT of cargo in the previous fiscal.

Essar Shipping CEO Ranjit Singh said the growth in volumes can be attributed to the increased coastal cargo movement undertaken by ESL. "In April-September of 2017-18, the company's 14-vessel diversified fleet had already handled 7.72 MT of dry bulk cargo. The cargo handling volumes in October and November this year were 1.25 MT and 1.27 MT, respectively. Given the trend, ESL is expecting to clock 18 MT of dry cargo in 2017-18," he said. The company has a 20 per cent market share in coastal cargo, Singh said. The 12 dry bulk carriers in ESL's fleet are engaged in coastal shipping as well as in overseas trade. The ports that these vessels berth at are almost all the 12 major Indian ports, including Kandla, Mumbai, Vizag, Mangalore and Paradip, as well as minor ports like Hazira, Okha, Dighi, and Kattupali. Essar Shipping has been moving cargo through the coastal shipping route since 1975.

The company serves industries including steel, cement, construction, minerals & metals, among others. The customers are a mix of Essar group companies as well as other companies operating in these sectors. ESL CEO said the company has placed order for four Supramax vessels (54,000 DWT each) whose delivery is scheduled in 2020. The company is also looking to add a Panamax vessel and tanker to its fleet in the next fiscal, which will increase its Dry Weight Tonnage (DWT) capacity from 1.63 million to 1.7 million. The plan is also to diversify its fleet, which comprises two Very Large Crude Carriers (VLCCs), to bring more balance between bulk and liquid cargo, he added.

HCL Technologies net up 6%

Business Brief

Audi India launches second generation Q5

New Delhi, Luxury car manufacturer Audi India on Thursday launched the all-new second generation Audi Q5 priced at Rs 53.25 lakh onwards. According to the company, the new Q5 is powered by a 2.0 TDI engine with a total output of 140 kW (190 hp) with seven-speed S tronic transmission. "With a lighter body, a whole new design language and a host of new infotainment and innovative features, the new Audi Q5 is the best offering in its segment available for our customers who want to enjoy driving whether it is on or off the road," said Rahil Ansari, Head, Audi India.

First round of bidding under OAL launched

New Delhi, The central government on Thursday launched the first round of bidding under the "Open Acreage Licensing" (OAL) programme for international competitive bidding. For the first time in India, 55 bidder-selected blocks, each carved out by prospective bidders themselves in promising basins with an area of 59,282 sq.km., were announced for bidding, the Ministry of Petroleum & Natural Gas said in a statement. "This is the largest offering of acreages the government has announced in the past eight years.

Kotak Mahindra Bank logs 20 per cent growth in net profit

Mumbai, Private sector Kotak Mahindra Bank on Friday said it closed the quarter ended on December 31, 2017 with 20 per cent growth in its net profit over the corresponding period the previous fiscal. In a regulatory filing in BSE, the bank said that on a standalone basis it had posted a net profit of Rs 1,053.21 crore, up from Rs 879.76 crore logged during same period in 2016. The bank's total income for the period under review was Rs 6,049.02 crore, up from Rs 5,377.83 crore earned in Q3 of FY17. The bank's net interest income for the period under review was Rs 2,394 crore, up from Rs 2,050 crore in Q3 of FY17.

Jio committed to use Open Source technologies to better consumer experience

Mumbai, Reliance Jio is committed to contribute and use Open Source technologies to better its consumer experience, the company's Director and Board Member Akash Ambani said here on Friday. "Open Source is very important for Jio - being both a contributor and utilising it for our business needs. Every day people when people use a LYF device, Jio Phone or Jio Application - their lives are enriched through the technologies enabled with Open source," Ambani said during his inaugural speech at the India Digital Open Summit.

Pakistan, Iran to restore passenger train service

Islamabad, Pakistan and Iran have decided to restore a fortnightly passenger train service between the two countries by September due to improvement in the security situation. A Joint Expert Committee meeting was held here on Thursday, Xinhua news agency reported. The train service will run between Pakistan's southwestern city of Quetta and the Iranian cities of Mashhad and Qom. The service will largely cater to the needs of pilgrims during Muharram, the first month of the Islamic calendar. The two sides also decided to run 15 regular freight trains between Quetta and Iran's Zahedan due to the demands of the business community. The Islamabad-Tehran-Istanbul train also came up for discussion at the meeting.

Baidu upgrades research institute to accelerate AI application

Beijing, Chinese Artificial Intelligence (AI) giant Baidu has upgraded its research institute to speed up industrial application of AI technology. Baidu Research announced on Friday that it has set up two more labs focusing on business intelligence, robotics and autonomous driving while bringing three more top AI scientists on board. The company's top AI research platform now has five labs and seven globally renowned AI scientists, reports Xinhua news agency. "The expansion of Baidu Research is the start of a new journey for Baidu to focus on frontier fundamental research and commercial application of AI," Wang Haifeng, Head of the Institute and Baidu Vice President, was quoted as saying.

Railway heritage theme park on the anvil at Rewari

New Delhi, Indian Railways is firming up a proposal to develop a railway heritage theme park, a first-of-its-kind in the country, at Rewari, in cooperation with the Union Tourism Ministry and the Haryana government.

The rail theme park, to be developed on the pattern of UK's Devon Railway Centre, would comprise of narrow gauge toy train, model train stations, railway exhibits and a convention centre to host corporate events. Similar theme parks exist in other countries, like the Edaville Park in the US and Ferrymead Heritage Park in New Zealand. The rail theme park will be part of the development of the Madhogarh-Mahendragarh-Narnaul-Rewari heritage route being developed by the Tourism Ministry under the Swadesh Darshan scheme.

Since the Railways has a heritage steam loco centre at Rewari, the development of a rail theme park on the adjoining land can convert the place into a tourist hotspot," a senior Railway Ministry official told IANS. Rewari, being easily accessible from the capital and Gurgaon, can become a major crowd-puller -- in the process developing its local economy and promoting tourism, he added.

The Railways has earmarked 8.8 hectares of land adjoining Rewari steam loco centre for the rail theme park. The Rewari steam loco centre has been recently renovated with many tourist facilities being provided for the purpose. There is a steam loco simulator where tourist can enjoy the feel of driving a Darjeeling Himalayan Railway steam locomotive, a 3-D virtual reality coach simulator depicting evolution of passenger coaches over time, a toy train, and a garden-scale model train system to educate visitors about various aspects of a train's operation.

In addition, the Rewari steam centre has an indoor exhibition gallery, a 35-seater projection room to display videos and conduct visitors' orientation, a century-old dining car and a cafeteria with a souvenir shop. Besides, it is also on the itinerary of the steam-hauled tourist special train which runs between Delhi Cantonment and Rewari every second Saturday during October-April. Currently the footfall at the Rewari centre ranges between 250 and 450 a day, primarily comprising domestic and foreign tourists, students and local visitors.

Equity indices trade at fresh highs led by banks stocks

Mumbai, Key Indian equity indices on Friday traded at fresh highs during the mid-afternoon session buoyed by broadly positive Asian indices, coupled with upbeat quarterly corporate earnings and healthy buying in banking stocks.

At 12.40 p.m., the wider Nifty50 of the National Stock Exchange traded higher by 19 points or 0.18 per cent at a fresh level of 10,836 points. On the BSE, the barometer 30-scrip Sensitive Index (Sensex), which opened at 35,339.11 points, traded at a new high of 35,368.51 points -- up 108.22 points or 0.31 per cent -- from its previous session's close. The Sensex has so far touched a high of 35,434.08 points and a low of 35,221.16 points during intra-day trade. However, the BSE market breadth was bearish as 1,663 stocks declined as compared to 1,030 advances.

Economic growth to pick-up in India: Reddy

Ahmedabad, Bajaj Allianz Life Insurance's Chief Investment Officer Sampath Reddy expects economic growth to pick-up in India, accentuated with a revival in the corporate earnings cycle, which would augur well for the markets over the medium to long term. Over the long term, market returns will reflect GDP growth and corporate earnings growth, and therefore investors should carry on investing in a disciplined manner to build wealth through the compounding effect of equities, was his opinion.

2017 was a good year for equity markets, helped by record high institutional flows from domestic mutual funds, and also a recent pick-up in foreign portfolio investor (FPI) flows. Investors have also been gradually shifting from traditional physical assets to financial assets, and this has especially picked up pace post de-monetization. Some of the reforms of the government have started bearing fruit, with India's ranking jumping by 30 places in World Bank's Ease of Doing Business 2018 rankings, from 130 in the previous year to 100 in this year -- making it the biggest jump for any country in this year's rankings. Corporate earnings revival and economic growth on recovery path are two of the major factors that will affect markets in this year. With corporate earnings being muted over the past few years, equity markets have been driven by PE expansion. Corporate earnings in India seem to have bottomed out. He expects earnings growth to pick up from 2HFY18 (second half of FY18), and that will drive markets, rather than PE expansion. The markets will be closely tracking this, as it has already priced in this revival.

Sri Lanka, China to co-build power plant

Colombo, Sri Lanka and China on Friday signed a joint venture agreement to construct Sri Lanka's largest dendro power plant in the country's south. The power plant will produce 70,000 megawatts of renewable energy a year to the national power grid. The joint venture was signed between Beijing Full Dimension Power Tech Co Ltd, Nanjing Turbine and Electric Machinery Group Co Ltd and Sri Lanka's IMS Holdings, Xinhua news agency reported. Speaking at the ceremony, Jinawara Dharmawardana, Chairman of IMS Holdings, said dendro power was the generation of electricity from sustainably grown biomass (fuel wood) and in this project the fuel would be produced from the wood of the Gliricidia Sepium tree.

Hundreds of farmers in the drought-prone Moneragala district will benefit from this project as the farmers supplying Gliricidia Sepium wood will make \$3.2 million per year as a result of the power plant, Dharmawardana said. Explaining the reasons for choosing Gliricidia Sepium wood as the fuel rather than solar power to run the turbines in the power plant, Dharmawardana said the primary mission of the company was to financially secure the farmers in drought-prone areas of the island nation. Hu Xingzhong, chairman of the Beijing Full Dimension Power Tech Co Ltd, said the project was of "great significance" not only to the partners but also to the two countries. The power plant will consist of six biomass boilers and three steam turbine generators as the core of the power generation system.

New Delhi, Regional trade and cooperation between neighbouring countries is adversely affected due to local politics, said Rajat Nag, economist and former Managing Director-General, Asian Development Bank, India. "Issues are really political, not because of lack of knowledge...not because people don't know what the benefits are...but its local politics which are coming in the way," Nag said at a seminar here on "Cross border Energy Cooperation in the Bay of Bengal Region" organised by CUTS International. Regional cooperation in South Asia is very low despite great potential and goodwill, he said. Trying to allay fears concerning cross-border trade due to security threats, he said, "more we get invested in each other...the security increases rather than decreases". Integrated nature of regional trade and cooperation should be built up in such a way that no one particular party would find it in its interest to disrupt the system, he added. Speaking about the people losing on land and property due to developmental projects, he said that, such people must be compensated adequately. "They are losers, and we need to honestly identify who they are and what do we do about compensating them fairly," the economist said. "Just assuming that regional trade, cooperation is good, is not good enough. You will have to show actually, how this process will work," Nag said.

Local politics major roadblock for regional trade, cooperation, says Ex ADB official

Washington, NASA's Jeanette Jo Epps, an astronaut and American aerospace engineer, will not be a part of the International Space Station (ISS) crew set to launch in June, the US space agency said. Epps, who would have been the first African-American crew member on board the ISS, was pulled from her mission for unspecified reasons. "A number of factors are considered when making flight assignments. However, these decisions are personnel matters for which NASA doesn't provide information," Brandi Dean, spokesperson at the Johnson Space Center was quoted as telling Arstechnica. Epps was a member of NASA's 20th class of astronauts, a group of nine known as the "Chumps" who were selected in June 2009. Only three other African-American women have flown into space. Epps' assignment in January 2017 garnered a fair amount of favourable publicity for the space agency. She had been assigned to her first spaceflight, Expedition 56/57, scheduled to launch in May 2018. Seven of the nine astronauts from that class have already flown into space. Epps, a native from New York, will be replaced by the other novice from the 2009 class, Serena Aunon-Chancellor, who was serving as Epps' backup for this mission. According to NASA, Epps had returned to the active Astronaut Corps at the space center to assume duties in the astronaut office. She will be considered for assignment to future missions.

NASA cancels African-American astronaut's first flight to space

NASA's Jeanette Jo Epps, an astronaut and American aerospace engineer, will not be a part of the International Space Station (ISS) crew set to launch in June, the US space agency said. Epps, who would have been the first African-American crew member on board the ISS, was pulled from her mission for unspecified reasons. "A number of factors are considered when making flight assignments. However, these decisions are personnel matters for which NASA doesn't provide information," Brandi Dean, spokesperson at the Johnson Space Center was quoted as telling Arstechnica.
